

March 16, 2010

To whom it may concern;

I am pleased to write this letter of recommendation for Aardvark. We brought Aardvark on to assist in the pre-screening and hiring of 10 professional drivers. Our program for the Vancouver 2010 Olympic Torch Relay Tour required drivers with a vast array of specialties' including driving supply tractor trailers, reefer trucks, large promotional vehicles, tour buses and SUV's across Canada.

Aardvark professional drivers were responsible for handling driver log books and complying with provincial laws, restrictions and regulations.

During the Vancouver 2010 Olympic Torch Relay Tour, the drivers were responsible for maintaining vehicles through extreme weather conditions and they successfully completed the 106 day Torch Relay Tour, including 45,000 kilometers on the road without any personal injury or vehicle damage.

As an agency owner myself, it is great to have found a specialty supplier whose commitment to excellence, flexibility and problem solving in this long journey helped make the program a success.

Sincerely,

A handwritten signature in black ink, appearing to read "Brent Nichols".
